

**The information below is
the recommended care & application guide
as supplied by the magnetic sheet manufacturer**

CARE AND APPLICATION - PLEASE READ

Care and use of magnetic sheet used for vehicle signs

The use of magnetic sheet for vehicle signs may, in exceptional circumstances, result in damage to vehicle paintwork. The following advice is therefore given to minimise the risk of such damage occurring. Whilst extensive tests have not given rise to any incidences of damage to paintwork whilst following the advice given on the care sheet, we do not guarantee that there will not be an adverse reaction between the magnetic sheet and the vehicle paintwork.

Do not apply magnetic sheet to newly painted surfaces, especially non-factory applied finishes. Do clean and polish the application area of the vehicle with a high quality wax polish, ensuring that both the vehicle and magnet are clean and dry prior to placing the magnetic sheet on the paintwork.

Do ensure that the magnetic sign is removed regularly, cleaned with soapy water, not solvents, rinsed, dried and re-applied. Ideally this should be done daily but at least every two days. In very hot weather, it **MUST** be done daily.

Do ensure that all of the magnetic sheet is in contact with the vehicle (avoid heavily contoured areas) to ensure maximum performance and thus avoid movement of the sign whilst in use at motorway speeds.

Do not use on body panels containing plastic filler since this will drastically reduce the magnetic performance

When not in use, keep the magnetic sign flat – preferably store it on a flat steel surface to avoid the magnetic face attracting airborne ferrous dust.

There is no warranty expressed or implied against loss of signs or damage to vehicle surfaces, as we have no control over how signs are cared for, altered, stored, and/or used, or the surface to which the signs are applied.

**For further care & use information, please
see additional sheet.**

MAGNETIC SIGNS

ADDITIONAL CARE AND USE

CARE AND APPLICATION - **PLEASE READ**

VERY IMPORTANT: Before using your magnetic signs you **MUST** read these instructions **CAREFULLY & FULLY**. Signs are mostly dispatched rolled to avoid damage in transit, **PLEASE LAY FLAT FOR AT LEAST 24 hrs BEFORE USING**.

1. Before fitting magnetic signs to your vehicle, make sure the area you wish to apply your magnetic to is clean and free from dirt and grit (dirt & grit will reduce magnetic grab)
2. Wax the area of the vehicle you wish to attach your signs to, this will help protect the vehicles paint finish. We do not recommend attaching signs to new or refinished paintwork that is less than 3 months old. Allow new paint to harden fully before using.
3. Always wipe the rear of the magnetic sign with a soft, lint free cloth before you apply to your waxed, clean & dry vehicle panel.
4. To achieve **FULL** magnetic grab, attach your magnetic **ONLY** to a flat or slightly curved surface, **NEVER** try to attach over ridges, recesses, trim, badges or door/panel gaps. The sign **MUST** be in contact with the whole of the vehicle & **MUST** not hang over panels, leaving edges that will catch the wind.
5. To apply the magnetic sign to your vehicle, place one corner down first and then position, once happy you have the sign in the correct position allow the rest of the sign to **GRAB** the surface, smooth out any bubbles or wrinkles until the sign is properly attached - The sign is **ONLY** properly attached when there are no wrinkles, air pockets or lifted corners. If you are not happy with the position of the sign, remove and reattach, **NEVER** attempt to pull or drag the sign into position, this will cause the sheet to stretch and will damage the shape of the sign making the sign liable to detach when driving.
6. It is recommended you remove magnetic signs at the end of each day, to prevent moisture or ice forming between the sign and vehicle panel.
7. Remove the magnetic sign carefully to avoid bending or creasing, bending or creasing will damage the sign & lessen the magnetic grab. **NEVER** use or fit damaged signs. Store separately preferably on a flat steel surface to avoid the magnetic face attracting airborne ferrous dust.
8. At the very least **EVERY** 2 days remove signs, clean with a mild soap solution, dry and reapply, in very hot weather this **MUST** be done on a daily basis. Clean signs **ONLY** with a mild solution of soap & water, **NEVER** clean signs or graphics with abrasive or solvent based cleaners - doing so will damage the magnetic, vinyl coating & graphics.
9. **ALWAYS** drive **WITHIN** the national speed limit, on long Motorway journeys, it is recommended you remove the signs.
10. Remove magnetic signs from your vehicle during adverse weather conditions such as **HIGH WINDS** & very bad **STORM CONDITIONS**.
11. Apply signs **ONLY** to steel bodied vehicles, **DO NOT** apply magnetic signs to rust, accident damaged body panels or panels containing plastic body filler, as this will greatly reduce the magnetic grab.

As we have no control over how signs are cared for, altered, stored, or used, or the surface to which the signs are applied. We are unable to offer any warranty for loss, damage or damage to vehicles paint finish to which signs are applied, it is in your interest to use magnetic signs carefully. We will not be held responsible for damage to property or persons
